

Skate to Where the Puck is Going

It may be a cliché, but the wisdom of hockey great WG's quote still rings true. With solar subsidies being phased out, rising hydro rates and declining battery prices, net metered solar with battery storage and microgrid connection is the next opportunity savvy developers are pursuing. To provide owners an easy to use online interface for equipment from different manufacturers with additional requests for EV charging and remote IoT control, Cachelan has introduced its new NRGpilot portal. [Contact Cachelan](#) with details of your next project from early adapter customers to get an affordable NRGpilot solution.

NRGpilot monitors generation, grid and storage providing online status, control and alarms.
